| Section 2. Hazar   | ds identification   |  |  |  |
| OSHA/HCS status  | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |  |  |  |
| Classification of the substance or mixture                 | : ACUTE TOXICITY (oral) - Category 4<br>SKIN CORROSION - Category 1<br>SERIOUS EYE DAMAGE - Category 1  |  |  |  |
| GHS label elements   |   |  |  |  |
| Hazard pictograms  |   |  |  |  |
| Signal word  | : Danger  |  |  |  |
| Hazard statements  | : Harmful if swallowed.<br>Causes severe skin burns and eye damage.   |  |  |  |
| Precautionary statement                                    | <u>s</u>  |  |  |  |
| Prevention   | : Wear protective gloves: > 8 hours (breakthrough time): butyl rubber. Wear eye or face protection: Recommended: splash goggles. Wear protective clothing. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling.  |  |  |  |
| Response   | : IF INHALED: Remove person to fresh air and keep comfortable for breathing.<br>Immediately call a POISON CENTER or physician. IF SWALLOWED: Immediately call<br>a POISON CENTER or physician. Rinse mouth. Do NOT induce vomiting. IF ON<br>SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or<br>shower. Wash contaminated clothing before reuse. Immediately call a POISON<br>CENTER or physician. IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a<br>POISON CENTER or physician. |  |  |  |
| Storage  | : Store locked up.  |  |  |  |
| Disposal   | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |  |  |  |
| I famousla wat atta and                                    |   |  |  |  |

Hazards not otherwise

: None known.

### Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

: Mixture

: Not available.

#### **CAS number/other identifiers**

| CAS number   | : Not applicable. |
|--------------|-------------------|
| Product code | : V01448, V01449  |

| Ingredient name                       | %   | CAS number                                     |
|---------------------------------------|---|--|
| potassium hydroxide<br>2-aminoethanol | ≥19.6 - <25<br>≥4.3 - <5<br>≥3.92 - <5<br>≥1 - <3 | 111-76-2<br>1310-58-3<br>141-43-5<br>1300-72-7 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necess | ary first aid measures  |
|-----------------------|---|
| Eye contact           | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
| Inhalation            | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact          | : Get medical attention immediately. Call a poison center or physician. Flush<br>contaminated skin with plenty of water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a<br>physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion             | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.                          |
| Most important sympt  | oms/effects, acute and delayed  |
| Potential acute healt | <u>n effects</u>  |

|---------------------------------------|---|---|
| Eye contact                           | 1 | Causes serious eye damage.                        |
| Inhalation                            | 1 | No known significant effects or critical hazards. |
| Skin contact                          | ÷ | Causes severe burns.                              |
|                                       |   |   |

# Section 4. First aid measures

| Ingestion                   | : Harmful if swallowed.   |  |  |  |
|-----------------------------|---|--|--|--|
| Over-exposure signs/symp    | <u>otoms</u>  |  |  |  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |  |  |  |
| Inhalation                  | : No specific data.   |  |  |  |
| Skin contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |  |  |  |
| Ingestion                   | : Adverse symptoms may include the following:<br>stomach pains  |  |  |  |
| Indication of immediate med | dical attention and special treatment needed, if necessary  |  |  |  |
| Notes to physician          | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>   |  |  |  |
| Specific treatments         | : No specific treatment.  |  |  |  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |  |  |

#### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |  |  |  |
|---|---|--|--|--|
| For non-emergency<br>personnel                                      | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Do not breathe vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |  |  |

3/13

### Section 6. Accidental release measures

| For emergency responders    | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
|-----------------------------|-----|---|
| Environmental precautions : |     | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods and materials for c | ont | ainment and cleaning up   |
| Small spill                 | :   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                 | :   | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or<br>on skin or clothing. Do not breathe vapor or mist. Do not ingest. If during normal use<br>the material presents a respiratory hazard, use only with adequate ventilation or wear<br>appropriate respirator. Keep in the original container or an approved alternative made<br>from a compatible material, kept tightly closed when not in use. Keep away from acids.<br>Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Separate from acids. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.                       |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name               |             |                        | Exposure limits  |

# Section 8. Exposure controls/personal protection

|                     | OSHA PEL (United States, 2/2013).      |
|---------------------|--|
|                     |  |
|                     | Absorbed through skin.                 |
|                     | TWA: 50 ppm 8 hours.                   |
|                     | TWA: 240 mg/m <sup>3</sup> 8 hours.    |
| potassium hydroxide | ACGIH TLV (United States).             |
|                     | TWA: 2 mg/m <sup>3</sup>               |
|                     | OSHA PEL (United States).              |
|                     | CEIL: 2 mg/m <sup>3</sup>              |
|                     | ACGIH TLV (United States, 3/2015).     |
|                     | C: 2 mg/m <sup>3</sup>                 |
|                     | OSHA PEL 1989 (United States, 3/1989). |
|                     | CEIL: 2 mg/m <sup>3</sup>              |
|                     | NIOSH REL (United States, 10/2013).    |
|                     | TWA: 2 mg/m <sup>3</sup> 10 hours.     |
| 2-aminoethanol      | ACGIH TLV (United States, 3/2015).     |
|                     | TWA: 3 ppm 8 hours.                    |
|                     | TWA: 7.5 mg/m³ 8 hours.                |
|                     | STEL: 6 ppm 15 minutes.                |
|                     | STEL: 15 mg/m <sup>3</sup> 15 minutes. |
|                     | OSHA PEL 1989 (United States, 3/1989). |
|                     | TWA: 3 ppm 8 hours.                    |
|                     | TWA: 8 mg/m <sup>3</sup> 8 hours.      |
|                     | STEL: 6 ppm 15 minutes.                |
|                     | STEL: 15 mg/m <sup>3</sup> 15 minutes. |
|                     | NIOSH REL (United States, 10/2013).    |
|                     | TWA: 3 ppm 10 hours.                   |
|                     | TWA: 8 mg/m <sup>3</sup> 10 hours.     |
|                     | STEL: 6 ppm 15 minutes.                |
|                     | STEL: 15 mg/m <sup>3</sup> 15 minutes. |
|                     | OSHA PEL (United States, 2/2013).      |
|                     | TWA: 3 ppm 8 hours.                    |
|                     | TWA: 6 mg/m <sup>3</sup> 8 hours.      |
|                     | -                                      |

| controls                       | If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.<br>Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. |
|--------------------------------|--|
| Individual protection measures |  |
| Hygiene measures :             | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection :          | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/ or face shield. If inhalation hazards exist, a full-face respirator may be required instead. Recommended: splash goggles  |
| Skin protection                |  |

5/13

# Section 8. Exposure controls/personal protection

| -   | · · ·  |
|---|--|
| Hand protection                               | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. > 8 hours (breakthrough time): butyl rubber |
| Body protection                               | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>  |
| Other skin protection                         | : Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved by a<br>specialist before handling this product.  |
| Respiratory protection                        | <ul> <li>Based on the hazard and potential for exposure, select a respirator that meets the<br/>appropriate standard or certification. Respirators must be used according to a<br/>respiratory protection program to ensure proper fitting, training, and other important<br/>aspects of use.</li> </ul>   |
| Personal protective<br>equipment (Pictograms) |  |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : Reactive or incompatible with the following materials: acids   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result               | Species | Dose       | Exposure |
|-------------------------|----------------------|---------|------------|----------|
| 2-butoxyethanol         | LC50 Inhalation Gas. | Rat     | 450 ppm    | 4 hours  |
|                         | LD50 Dermal          | Rabbit  | 220 mg/kg  | -        |
|                         | LD50 Oral            | Rat     | 250 mg/kg  | -        |
| potassium hydroxide     | LD50 Oral            | Rat     | 273 mg/kg  | -        |
| 2-aminoethanol          | LD50 Oral            | Rat     | 1720 mg/kg | -        |

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species    | Score | Exposure     | Observation |
|-------------------------|--------------------------|------------|-------|--------------|-------------|
| 2-butoxyethanol         | Eyes - Moderate irritant | Rabbit     | -     | 24 hours 100 | -           |
|                         |                          |            |       | milligrams   |             |
|                         | Eyes - Severe irritant   | Rabbit     | -     | 100          | -           |
|                         |                          |            |       | milligrams   |             |
|                         | Skin - Mild irritant     | Rabbit     | -     | 500          | -           |
|                         |                          |            |       | milligrams   |             |
| potassium hydroxide     | Eyes - Severe irritant   | Rabbit     | -     | -            | -           |
|                         | Eyes - Moderate irritant | Rabbit     | -     | 24 hours 1   | -           |
|                         |                          |            |       | milligrams   |             |
|                         | Skin - Severe irritant   | Guinea pig | -     | 24 hours 50  | -           |
|                         |                          |            |       | milligrams   |             |
|                         | Skin - Severe irritant   | Human      | -     | 24 hours 50  | -           |
|                         |                          |            |       | milligrams   |             |
|                         | Skin - Severe irritant   | Rabbit     | -     | 24 hours 50  | -           |
|                         |                          |            |       | milligrams   |             |

#### Reproductive toxicity

Not available.

**Teratogenicity** 

Not available.

#### Specific target organ toxicity (single exposure)

| Name                    |            | Route of<br>exposure | Target organs                   |
|-------------------------|------------|----------------------|---------------------------------|
| 2-aminoethanol          | Category 3 |                      | Respiratory tract irritation    |
| sodium xylenesulphonate | Category 3 |                      | Respiratory tract<br>irritation |

#### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

routes of exposure

Not available.

#### Information on the likely : Routes of entry anticipated: Oral, Dermal, Inhalation.

#### Potential acute health effects

| Eye contact  | : Causes serious eye damage.                        |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : Causes severe burns.                              |
| Ingestion    | : Harmful if swallowed.                             |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness                           |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur |
| Ingestion    | : Adverse symptoms may include the following:<br>stomach pains   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>     |                  |
|--------------------------------|------------------|
| Potential immediate<br>effects | : Not available. |
| Potential delayed effects      | : Not available. |

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| 2-butoxyethanol         | 0.81   |     | low       |
| 2-aminoethanol          | -1.31  |     | low       |
| sodium xylenesulphonate | -3.12  |     | low       |

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

#### Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 16. Other information

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.
